

## ASP.NET Core 8.0 GIT - LAB 5

1. Verify if master is in clean state.

```
souptik@3201Lappu: ~/tempGit/git_pull_clean$ git init
hint: Using 'master' as the name for the initial branch. This default branch name
hint: is subject to change. To configure the initial branch name to use in all
hint: of your new repositories, which will suppress this warning, call:
hint:     git config --global init.defaultBranch <name>
hint: Names commonly chosen instead of 'master' are 'main', 'trunk' and
hint: 'development'. The just-created branch can be renamed via this command:
hint:     git branch -m <name>
Initialized empty Git repository in /home/souptik/tempGit/git_pull_clean/.git/
souptik@3201Lappu: ~/tempGit/git_pull_clean$ git status
On branch master

No commits yet

nothing to commit (create/copy files and use "git add" to track)
souptik@3201Lappu: ~/tempGit/git_pull_clean$
```

2. List out all the available branches.

```
souptik@3201Lappu: ~/tempGit/git_pull_clean$ git branch
* master
souptik@3201Lappu: ~/tempGit/git_pull_clean$ git status
On branch master
nothing to commit, working tree clean
souptik@3201Lappu: ~/tempGit/git_pull_clean$
```

3. Pull the remote git repository to the master

```
souptik@3201Lappu: ~/tempGit/git_pull_clean$ git branch
* master
souptik@3201Lappu: ~/tempGit/git_pull_clean$ git status
On branch master
nothing to commit, working tree clean
souptik@3201Lappu: ~/tempGit/git_pull_clean$ git add origin // remote repo address
fatal: ../: '//' is outside repository at '/home/souptik/tempGit/git_pull_clean'
souptik@3201Lappu: ~/tempGit/git_pull_clean$ git pull origin master
```

4. Push the changes, which are pending from “Git-T03-HOL\_002” to the remote repository.

```
souptik@3201Lappu: ~/tempGit/git_pull_clean$ git push -u origin master
```
